

Kasujja Elijah

Design Engineer · UI/UX Designer & Web Developer

Kampala, Uganda · elijahkasujja@gmail.com · +256 759 561 506

Portfolio: elijahkasujja.com

PROFILE

Design engineer based in Kampala, Uganda. I design and develop digital products end to end. My work spans the full web stack: user research and information architecture through to shipped code, CMS architecture, integrations, and deployment. By day I'm the lead product designer at Rwazi, an AI-driven market intelligence company, where I own a cross-platform design system and ship responsive, data-rich interfaces. In parallel, I design and build websites for African organisations: research institutions, NGOs, and Pan-African brands. WCAG-aware, mobile-first, and equally at home in Figma and a code editor.

SELECTED WEBSITE PROJECTS

Designed and developed end-to-end. Five live, public-facing sites.

Enterprise Uganda · enterprise.co.ug

National Business Development Services Centre of Excellence. WordPress build with a custom theme, ACF-driven content templates, and editorial workflows. IA, UX/UI, development, CMS setup, staff training.

Space for Wildlife · spaceforwildlife.org

Kenyan wildlife conservation NGO. Framer build with content modelling for blog, Our Work, and Get Involved, plus Flutterwave donation integration. IA, UX/UI, development.

Divinus Investment Group · divinus.io

Multi-division Pan-African group company. Seven interconnected divisions across distinct content templates. Custom Next.js + Tailwind build with sophisticated wayfinding. IA, UX/UI, development.

Aerocruise · aerocruise.co.ke

Kenyan luxury air charter and safari operator. Multiple coexisting content types (charters, safaris, experiences, accommodations, destinations, blog) with filterable repositories. Custom Next.js build. IA, UX/UI, development.

Kabojja International School · kabojjainternational.com

Ugandan international school. Multi-audience institutional site (parents, students, staff, partners). IA, UX/UI, development.

EXPERIENCE

- Lead end-to-end UX/UI for SaaS and mobile platforms at an AI-driven market intelligence company.
- Built and maintained a cross-platform design system in Figma, used by engineering as the single source of truth for shipped components.
- Designed and shipped responsive data dashboards for real-time monitoring; applied data visualisation and WCAG accessibility principles throughout.
- Designed the UI for "Ela," an AI-powered chatbot.
- Partner closely with engineering on implementation: write specifications, deliver production-ready assets, and stay hands-on through build.
- Redesigned the sign-up flow, lifting conversion rates across the SaaS platform.

- Designed and built brand identities and responsive websites for early-stage African companies.
- Led visual identity development (logos, typography systems, colour systems, brand guidelines) to support new product launches and market entry.
- Translated brand into shipped digital experiences, owning both the design and the development.

CAPABILITIES

Design

UX research (qualitative & quantitative) · Information architecture · Wireframing & prototyping · Design systems · WCAG 2.1 AA accessibility · Responsive design (mobile-first) · Data visualisation · Interaction design

Development & Engineering

Front-end: HTML · CSS · JavaScript / TypeScript · React · Next.js · Tailwind CSS · MDX
Back-end & CMS: PHP / WordPress (custom themes, ACF, headless) · Next.js API routes · Webflow · Framer · Headless CMS architecture · REST API & third-party integrations (forms, payments, mailing list)
Infrastructure & ops: Git / GitHub · Vercel & traditional hosting · Web security (SSL, secure authentication) · SEO & performance optimisation · Analytics setup

Tools

Figma (advanced) · Adobe Illustrator · Adobe Photoshop · Notion · Maze · Hotjar · Google Analytics · Plausible

LANGUAGES

English: C1 Advanced
